### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. This application is in condition for allowance except for the presence of claims 16-27 to an invention non-elected without traverse. Accordingly, claims 16-27 have been cancelled.

The application has been amended as follows:

IN THE CLAIMS:

Cancel claims 16-27

### ***Amendment After Final***

The amendment after Final, received 3/18/2004 has been entered.

### ***Terminal Disclaimer***

The terminal disclaimer filed on 3/18/04 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Patent No. 6,135,990 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Reasons For Allowance***

Claims 1-15 are allowed. Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 12-14, directed to an additional species are no longer withdrawn from consideration since all of the claims to this

Art Unit: 3763

species depend from or otherwise include each of the limitations of an allowed generic claim.

See 37 CFR 1.141.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Claims 1-15 are allowed because the recited combination of elements of a device for manipulating a molecule in vivo including an elongate member having a core electrode, an insulator sleeve in surrounding relation to the core electrode and an outer electrode surrounding the insulator sleeve with the sleeve protruding from the outer electrode, where the electrodes are in independent circuit communication with a respective portion of electrical energy and configured to establish a first and second electromagnetic field in vivo to cause electromigration and transient permeability is not found nor fairly taught in the prior art of record.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Hayes at (703) 305-5873. The examiner can usually be reached Monday -Thursday, 7:00-4:30, and on alternate Fridays. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Casler, can be contacted at (703) 308-3552. The fax number for submitting official papers is (703) 872-9306.
